Customer Add Form Test Report Document

Copy-Paste Restriction in Input Fields:

1. Copy-paste is not working in the **First Name**, **Last Name**, and **Mobile Number** fields. It should allow copy pasting for user convenience

Mobile Number Verification:

2. Once a mobile number is verified successfully, if the user changes the number, the previously **verified** Text should not be cleared.
3. The OTP popup should not reappear for a successfully verified number unless the number is changed.
4. When a new number is entered, the OTP popup should appear for verification.

OTP Field Validation:

- Set the OTP field as a **VARNUM**.
- Ensure the OTP field does not accept **special characters or alphabets**.

Enter Code:

tyertyer\$#%#\$%#%#%

Verify

OTP expires in 74 Seconds

Date of Birth Validation:

7. Add proper validation for the Date of Birth field to accept valid date formats only.
8. Ensure the Date of Birth field does not accept numbers or special characters outside of the date format.

Date of Birth * 27 Years

29/09/1997tewrtwe

Gender Selection:

9. Prevent navigation to the next page unless the gender is selected.

Voter ID Document Input Field Validation:

10. Set the fields for **Voter ID** as VARCHAR.

AADHAR ID Document Input Field Validation:

11. Set the fields for Aadhar ID as VARCHAR.

Aadhar ID Formatting:

12. Automatically format the **Aadhar number** to include **spaces** after every 4 digits (e.g., 1234 5678 9012).

Driving License ID Document Input Field Validation:

13. Set the fields for **Aadhar ID** as VARCHAR

Driving License ID Formatting:

14. Automatically format the Driving License ID by **inserting a space** after the **state code** (e.g., TN01 20264934960).

PAN ID Document Input Field Validation:

15. Set the fields for **PAN ID** as VARCHAR.

16. Pan Name field should not enter **numbers** or special **characters**.

NAME ON PAN*

&^^&5464654665

Document Upload Errors:

17. If voter ID, Aadhar ID, or driving license images are not uploaded, display specific error messages:

18. For Voter ID Front: "**Please provide the voter ID front images.**"

19. For Voter ID Back: "**Please provide the voter ID back images.**"

20. For Aadhar ID Front: "**Please provide the Aadhar ID front images.**"

21. For Aadhar ID Back: "**Please provide the Aadhar ID back images.**"

22. For Driving License Front: "**Please provide the driving license front images.**"

23. For Driving License Back: "**Please provide the driving license back images.**"

24. For PAN Front: "**Please provide the Pan front images.**"

25. For PAN Back: "**Please provide the Pan back images.**"

Country-State Mismatch:

26. If the selected country is **China**, ensure that state options do not display Indian states.

Country*

Algeria

State*

Andhra Pradesh

Nominee Name Field Validation:

27. The **Nominee Name** field should not accept numbers or special characters.

Nominee Details

Name*

346535^*&^&^^*

Nominee Relationship Field Validation:

28. The **Nominee Relationship** field should not accept numbers or special characters.

Relationship*

346535^*&^&^^*|

Toaster Message:

29. Increase the Toaster Show Message Times.

Customer Edit Option Open:

Title Unselected:

1. Ensure the **Title** field (e.g., Mr, MS, and Mrs) is pre-selected if already available in the data.
2. If no title is stored, display a placeholder such as "**Select Title.**"

Profession Not Displaying:

3. Ensure the **Profession** field retrieves and displays the stored value when the edit option is opened.
4. Add a placeholder if no profession is selected, such as "**Enter Profession.**"

Gender Unselected:

5. Pre-select the stored **Gender** value (Male/Female/Other) not showing.

Date of Birth Not Displaying:

6. Display the previously entered **Date of Birth** in the correct format (e.g., DD/MM/YYYY).
7. If missing, allow the user to select or manually input the date.

Wedding Date Not Displaying:

8. Retrieve and display the stored **Wedding Date**.
9. **Wedding Date** field is empty.

Religion Not Showing:

10. Ensure the stored **Religion** value is displayed.
11. Add a placeholder such as "**Select Religion**" if no value is available.

Address Fields (Address 2 and Address 3):

12. Retrieve and display the values for **Address 2** and **Address 3** if available.
13. Ensure placeholders like "**Enter Address Line 2**" and "**Enter Address Line 3**" appear if fields are empty.

Pin code Missing:

14. Ensure the stored **Pin code** is retrieved and displayed.
15. If no value exists, show a placeholder such as "**Enter pin code.**"

Address Proof Not Displaying:

16. Ensure the **Address Proof** (e.g., Driving Licence, voter ID, Aadhar) is retrieved and displayed as uploaded files for review.
17. If not uploaded, prompt with "**No Address Proof Uploaded.**"

KYC Not Showing:

18. Display the stored **KYC Status**
19. If missing, provide a message like "**KYC Information Not Available.**"

Suggested Corrections:

Text Formatting and Grammar:

- Update the placeholder text from **"Enter valid mobile number"** to **"Enter a valid mobile number."**
- Change the error message from **"This field is required."** to **"This field is mandatory."** or **"A valid mobile number is required."**

Design Improvement:

- Align the error message directly below the input field to maintain a cleaner and more professional design.
- Use a consistent font style and size for both the placeholder and error message.

Color and Visual Cue Enhancements:

- Use a softer red or an orange shade for the error message to avoid visual strain.
- Add a red border around the input field to indicate the error visually.

Final Example:

- Placeholder: **"Enter a valid mobile number."**
- Error Message: **"Please enter a valid mobile number."**
- Input Field Border: **"Red when validation fails. "**

Mobile *

+91

Enter valid mobile number

This field is required.

First Name Field:

- Add a placeholder such as **"Enter First Name"** to the **First Name** field for better guidance.

Date of Birth Field:

- Add a placeholder such as **"Enter Date of Birth (DD/MM/YYYY)"** or **"Select Date of Birth"** to make it clear what input or action is required.

The image shows a registration form with the following elements:

- First Name ***: An empty text input field with a red error message below it: "This field is required."
- Last name**: A text input field containing the letter "S".
- Mobile ***: A dropdown menu showing "+91" and a text input field containing "mobile already exists". A green checkmark and the word "Verified" are next to the label. A red error message below the field says: "This field is required."
- E-Mail ***: A dropdown menu showing "x" and a text input field containing "Enter valid email id". A red error message below the field says: "This field is required."
- Phone**: A text input field containing "9597169064".
- Select Religion**: A dropdown menu showing "Select Religion Name".
- Date of Birth * 25 Years**: An empty text input field with a red error message below it: "This field is required."
- Wedding Date**: An empty text input field.

Font and Size Consistency:

- Ensure that all placeholder texts across input fields (e.g., **First Name**, **Mobile Number**, and **Date of Birth**) use the same font family, font size, and Color for a uniform design.
- Maintain the same font size for placeholders as the input text, ensuring they align with the overall design.

Consistency Example:

- **First Name**: Placeholder: "Enter First Name"
- **Mobile Number**: Placeholder: "Enter Valid Mobile Number"
- **Date of Birth**: Placeholder: "Enter Date of Birth (DD/MM/YYYY)"
